(Geotechnique, Construction Materials & Environment) ISSN: 2186-2982(Print), 2186-2990(Online)

Founded in 2011, *The "International Journal of GEOMATE*" is a Scientific Journal of the GEOMATE International Society that encompasses a broad area in Geotechnique, Construction Materials, and Environment. The key objective of this journal is to promote interdisciplinary research from various regions of the globe. The journal's editorial board is comprised of extensively qualified researchers, academicians, and scientists from Japan and other countries of the world. It is a peer-reviewed journal that is published quarterly. All articles published in this journal are available online. Contributors may download the manuscript preparation template for submitting the paper or contact the Editors-in-Chief [editor@geomatejournal.com].

Aims and Scopes:

The journal aims to become an efficient means of publishing and distributing high-quality information from researchers, scientists, and engineers. The main scopes are as follows:

- Advances in Composite Materials
- Computational Mechanics
- Foundation and Retaining Walls
- Slope Stability
- Soil Dynamics
- Soil-Structure Interaction
- Pavement Technology
- Tunnels and Anchors
- Site Investigation and Rehabilitation
- Ecology and Land Development
- Water Resources Planning
- Environmental Management
- Earthquake and Tsunami Issues
- Safety and Reliability
- Geo-Hazard Mitigation
- Case History and Practical Experience
- Others

Review Policy:

- The paper which meets the editorial criteria will be assigned to at least two anonymous reviewers for peer review.
- Authors may recommend some reviewers however, Editors are entitled to consider them or not.
- The Editorial Board consists of an outstanding group responsible for the review process of the submitted manuscripts and will guarantee the quality of the publication.
- The manuscript will be published as soon as accepted, and all the modifications recommended by the reviewers are made.
- The review procedure is as strict as in the most prestigious journals, but publication time is minimized.
- Based on the reviewers' comments, the Editors will decide on a paper as one of the following four conditions:
- 1. Accept without revision
- 2. Accept with minor revision
- 3. Encourage to resubmit with major revision
- 4. Reject

In case of acceptance with minor or major revisions, the authors will be advised to revise the manuscript according to the reviewers' comments.

(Geotechnique, Construction Materials & Environment) ISSN: 2186-2982(Print), 2186-2990(Online)

Instruction to Author:

The manuscript to be submitted should be prepared using the manuscripts submission template.

Download the manuscript formatting template from the download files menu.

The manuscript to be submitted adheres to the rules and guidelines given in the manuscript template.

The manuscript should be written in English. A list of references must be translated into English if other languages (both should be noted).

The page limit is 8 pages for an ordinary manuscript and 10 pages for the invited manuscript.

The references inside the text and in the bibliographic list should follow the formats as per the manuscript template.

All figures, graphs, and tables must follow the font style of the text. Ensure clear and good-quality pictures in the first submission.

Selected manuscripts from the "GEOMATE Conference Presentation" will be reprinted in the journal with nominal charges (40% discount on regular fees) based on the agreement of the authors.

Accepted papers not presented at the "GEOMATE Conference" need publication charges of 800 USD as regular fees. Any page or fraction exceeding the page limit will be charged 100 USD per page. The extra author fee is 100 USD/author if exceeding 5 authors.

This is required for its maintenance, such as managing article submission and peer review, typesetting, tagging, and indexing of articles, hosting articles on dedicated servers, supporting sales and marketing costs to ensure global dissemination via different databases, and permanently preserving the published journal article.

Copyright: GEOMATE is required to obtain the copyright of papers from authors for the term of copyright by signing and returning the publishing agreement.

Submission Method:

Submit the full manuscript online using the "Submission" menu. We accept online submissions only. Copyright release form to be E-mailed separately along with the manuscript submission. Download it from the "Download Files Menu."

Abolition of the printed version: Considering environmental conservation, the paper version has been discontinued since June 2016.

For any questions: Contact us [editor@geomatejournal.com].

Membership Fees: Regular Member 100USD/year; Life Member 900USD only.

Membership Benefits:

- Receive Membership ID/Card
- Use M.G. or L.M.G. after your name (M=Member, G=Geomate, L=Life)
- Be involved in GEOMATE technical committees and activities
- Be up-to-date on the current development in the field
- Priority right to participate in international conferences with 20% discount
- 20% discount for Journal paper publication
- Vote in the election of GEOMATE officers
- Access to the Journal webpage

Membership Application (send the related items below using the online form):

- Full Name:
 Title/Position (check one): □ Prof. □ A/Prof. □ Dr. □Mr. □Ms.
 Membership Category (check one): □ Regular Member □ Life Member □ Others
- Address:
- Tel & Fax:
- E-mail (co-authors' e-mail separated by comma):
- Research Area (check one): □ Geotechnique □ Construction Materials □ Environment □ Others

STATEMENT ON PUBLICATION ETHICS AND PUBLICATION MALPRACTICE (1/2)

The International Journal of GEOMATE is a double-blind peer-reviewed journal. All parties involved in publishing an article for this journal, i.e., the editors, the author, the peer-reviewers, and the publisher, must follow the ethical behavior indicated in the COPE's Best Practice Guidelines for Journal Editors. In order to warrant high-quality scientific publications, public trust in scientific findings, and that people receive credit for their ideas, the ethical standards for publication are followed.

DUTIES OF EDITORS

<u>A decision on the Publication of an Article:</u> Based on the double-blind peer review of a paper, the Chief Editor and the Associate Editor are responsible for deciding which articles are accepted for publication. Neither the Chief Editor nor the Associate Editor has the authority to influence the reviewers conducting the blind review of the articles submitted for peer review. The Chief Editor and the Associate Editor may be guided by the policies of the journal's Editorial Board and subjected to such legal requirements regarding libel, copyright infringement, and plagiarism.

<u>Honest Play:</u> Manuscripts submitted to GEOMATE shall be exclusively evaluated based mainly on their intellectual quality and significance. GEOMATE will not consider authors' race, gender, sexual orientation, religious beliefs, ethnic origin, citizenship, or political philosophy.

<u>Confidentiality:</u> The Chief Editor, the Associate Editor, and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher.

<u>Disclosure and Conflicts of Interest:</u> Unpublished materials disclosed in a submitted manuscript must not be used by anyone who has a view of the manuscript (while handling it) in their own research without the express written consent of the author.

DUTIES OF REVIEWERS

The contribution of Double-Blind Peer Review: Any identifying information will be stripped out from the submitted paper so that the reviewers do not know any information about the authors and vice versa, i.e., reviewers' comments to the editors are confidential and before passing on to the authors, it will be made anonymous. The Double-Blind Peer review assists the reviewers in making editorial decisions, while editorial communications with the author may also assist the author in improving the manuscript. The names of the reviewers are known only to the Chief Editor and the Associate Editor, and it remains strictly confidential to authors.

<u>Punctuality:</u> Any selected referee who feels unqualified to review the assigned manuscript or unable to provide a prompt review should notify the Chief Editor and the Associate Editor and excuse themselves from the review process.

<u>Confidentiality:</u> Private information or ideas obtained through double-blind peer review must be kept confidential and not used for personal advantage. Manuscripts received for review must be treated as confidential documents. Without any authorization by the Chief Editor and the Associate Editor, the information of the submitted manuscript must not be shown to or discussed with others.

<u>Standards of Objectivity:</u> There shall be no personal criticism of the author. Reviewers should express their views clearly with supporting arguments, and reviews should be conducted objectively.

<u>Acknowledgment of Sources:</u> Authors should cite relevant references and corresponding citations if any statement in the submitted paper has been published or reported elsewhere. Reviewers should identify relevant published work that the authors have not cited. If a reviewer finds any substantial similarity or overlap between the submitted manuscript and any other published works, s/he should inform the Chief Editor/Associate Editors.

<u>Conflict of Interest:</u> In any reviewers find that the submitted manuscript has conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions, s/he should not review those manuscripts and notify the Chief Editor/Associate Editors prompt.

DUTIES OF AUTHORS

<u>Reporting Standards:</u> Authors of original research papers should present an accurate account of the work performed and objectively discuss its significance. Underlying data should be represented accurately in the paper. A manuscript should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable.

<u>Data Access and Retention</u>: Authors may be asked to provide the raw data in connection with a paper for editorial review and should be prepared to provide such data for public access or access to the journal's readers.

<u>Originality and Plagiarism:</u> The authors should ensure that they have written entirely original works. If the authors have used the work and words of others, this must be appropriately cited or quoted. All papers published by the International Journal of GEOMATE are committed to publishing only original material, i.e., material that has neither been published elsewhere nor is under review elsewhere. A paper that is found to have been plagiarized from a manuscript by other authors, whether published or unpublished, will incur plagiarism sanctions.

(Geotechnique, Construction Materials & Environment) ISSN: 2186-2982(Print), 2186-2990(Online)

STATEMENT ON PUBLICATION ETHICS AND PUBLICATION MALPRACTICE (2/2)

<u>Acknowledgment of Sources:</u> Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work.

<u>Manipulation of Citations</u>: Submitted papers that are found to include citations whose primary purpose is to increase the number of citations to a given author's work or articles published in a particular journal will incur sanctions for manipulating citations.

<u>Falsification and Fabrication</u>: Submitted papers that are found to have either falsified or fabricated numerical/experimental results, including the manipulation of images, will incur data fabrication and falsification sanctions.

<u>Authorship:</u> The authorship of a paper should be limited to those who have contributed significantly to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Others who have participated in certain substantive aspects of the research project should be acknowledged or listed as contributors.

<u>Scientific Contribution</u>: All listed authors must have made a significant scientific contribution to the research in the manuscript and approved all its claims. It is important to list everyone who made a significant scientific contribution, including students and laboratory technicians.

<u>Corresponding Author</u>: Corresponding Author is the author responsible for communicating with the journal for publication. The corresponding author should ensure that all appropriate co-authors and no inappropriate co-authors are included in the paper. All co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

Acknowledgment of Funding Sources: Funding sources for the research reported in the manuscript should be duly acknowledged after the conclusion and before the list of references.

<u>Disclosure and Conflicts of Interest:</u> All sources of financial support for the project or any substantive conflict of interest that might be interpreted to influence the results of the paper should be disclosed.

<u>Fundamental Errors in Published Works:</u> The author must promptly notify the Chief Editor/Associate Editor if s/he discovers a significant error or inaccuracy in their published work to retract or correct the paper.

<u>Redundant, Concurrent, or Multiple Publications:</u> An author should not generally publish manuscripts describing essentially the same research in more than one journal or primary publication. Manuscripts found to have been published elsewhere or under review elsewhere will incur duplicate submission/publication sanctions. Suppose authors have used their own previously published work or work that is currently under review as the basis for a submitted manuscript. In that case, they must cite the previous work and indicate how their submitted manuscript offers novel contributions beyond those of the previous work. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behavior and is unacceptable. Redundant publications involve the inappropriate division of study outcomes into several articles.

SANCTIONS

Suppose there are documented violations of any of the policies mentioned above in any journal. In that case, regardless of whether or not the violations occurred in a journal published by GEOMATE, the following sanctions will be applied:

- ${\bf \cdot} Immediate\ rejection\ of\ the\ infringing\ manuscript.$
- •Immediate rejection of every other manuscript submitted to GEOMATE by any of the authors of the infringing manuscript.
- •The prohibition against all authors for any new submissions to GEOMATE, either individually or in combination with other authors of the infringing manuscript, as well as in combination with any other authors. This prohibition will be imposed for a minimum of five years.
- Prohibition against all of the authors from serving on the Editorial Board of the International Journal of GEOMATE

 In cases where the violations of the above policies are found to be particularly outrageous, the publisher reserves the right to impose additional sanctions beyond those described above.
